- Gap Inc. Hackathon Winner, 2021
- Phillips-Perry Black Excellence Award, 2019-2021

Work Experience

Oracle

User Experience Design Intern | May 2025 – Aug 2025 | Seattle, WA

- Created an Oracle Health conversational AI model to help frontline health providers rapidly triage and coordinate care delivery for patients in disaster zones
- Conducted user research and interviews to frame problem area to further scope down a viable solution for both patients and providers
- Collaborated with product managers and human factors researchers to pinpoint and analyze previous research, data, and findings to inform design decisions
- Introduced a new communication model within the patient portal to enhance continuity of virtual care

Children's National Hospital

Associate Graphic Designer | Feb 2024 – July 2024 | Washington, D.C.

- Developed graphic and data visualization assets for grants, including the Patient-Centered Outcomes Research Institute (PCORI) project, which secured over \$4.2 million in funding to research maternal mental health treatment for Black women in Washington, D.C.
- Designed and maintained the Developing Brain Institute research lab website, ensuring compliance with accessibility standards and effective brand asset management

Gap Inc.

User Experience Designer | Aug 2022 – May 2023 | San Francisco, CA (Remote)

- Generated \$4 million in revenue from POD testing and feature implementations on brand homepage and navigation
- Enhanced digital retail and e-commerce experiences for responsive web and native apps in an agile workflow environment
- Applied design thinking to problems from beginning to end, implementing research insights into creative, transformative ideas that addressed customer pain points and key business indicators for stakeholders across Gap Inc.'s portfolio of brands
- Collaborated with the design systems team to create reusable UI components for Gap Inc.'s design library utilizing tools such as Figma and zeroheight

User Experience Design Intern | June 2021 – Aug 2021 | San Francisco, CA (Remote)

- Facilitated cross-functional collaboration with product managers, UX researchers, customer insights, and engineers to create web experiences across each brand
- Illustrated and presented process flows, journey maps, wireframes, and prototypes utilizing Figma based on competitive analysis, user research, and testing

Stemista Board Game

Co-Founder & Product Designer | Oct 2019 – May 2022 | Elon, NC

- Performed market research to create a unique, next-generation board game to address the issue of an underrepresentation and low retention rate of women and people of color in STEM
- Possessed the flexibility of working independently and in a small team throughout the product development process from inception to launch
